

Sea Safety Consulting Ltd.

Our mission

As we know there is an ever-increasing focus from enforcing authorities on fishing vessels and fishing businesses to meet both the ILO Work in Fishing Convention No.188 and the Fishing Vessels Safety Management Code (MIN 558) which have been designed and introduced to improve transparency mechanisms, improve working conditions and help control risk within the fishing industry. Sea Safety Consulting Ltd can play a pivotal role for you in the implementation of both on your vessel.

What we offer

To work closely with all parties regarding fishing vessel and company health, safety and environmental risk management.

- Providing training, reviews, audits and inspection programs to ensure compliance with all relevant legislation.
- Highlight to owners and skippers any areas of potential risk and implement corrective actions.
- Assist fishing vessel owners in the effective management of their statutory duties.
- Conduct vessel audits and generate action plans for the requirement of continuous improvement.

In addition if required Sea Safety Consulting Health and Safety Management Services will include.

- Health and safety policies and management systems for fishing vessels.
- Workplace risk assessments.
- Safe systems of work and standard operating procedures.
- Health and safety training with vessel skippers and crews.
- Accident, incident and emergency support.
- Health and safety evaluations and/or compliance reviews.

Why us

We are flexible, professional and take pride in what we do. Working in partnership with vessel owners and skippers we will tailor solutions that prevent incidents, safeguard people and ultimately boost fishing operations. Being uniquely positioned in this specialist area we will assist fishing vessel owners and operators to achieve compliance obligations by implementing and managing bespoke safety solutions based on the needs of the fishing industry.

Our aim will not only focus on regulation but on capabilities and skills building through training, education and coaching of skippers and crews - to build a living and robust safety culture within our fishing industry. Our goal is to enable vessel owners and skippers not just to meet regulatory and statutory requirements but to exceed them, reducing safety and environmental incidents, preventing lost time and vessel operational disruptions, but most importantly - protecting the lives of our fishermen. Keep your crew safe, your vessel compliant and your inspections hassle free.
